

XM Instant Traffic & Weather.....thats exactly what it is, and thats why it is my first pre-set. When I'm sitting in traffic on 376 going in or out if the city, all I need to do is turn it on and BAM!!! there it is, all the traffic and weather information I need to know! It's a great idea, and I think the NAB just can't stand the fact that they didn't think of it first. Quite frankly XM radio is great, and limiting there brocasting rights is no only consitiutionally unsound, but will also frustrate a great number of people.
